

Green and digital objectives									
Please indicate if 0%, 40% or 100% of the reform/investment contributes to the objective. For reforms/investments and the climate objective, use the methodology for climate tracking as set out in Annex II A and justify their choice for each investment and each reform. For reforms/investments related to environmental objectives, use the same methodology. For the digital objective, use the methodology as set out in Annex III. In all cases, please indicate the relevant intervention field for every reform/investment by choosing the most appropriate one, reflecting the nature, focus, objective, or expected outcome of the reform/investment. If several intervention fields can be applied, provide a motivation in the description of the component. As a general rule, a reform/investment should be assigned one intervention field.
